

## Case Study

# TOM PRICE PAVILION

### **“A Sporting Community Facility.”**

Given the opportunity to be involved with the builder in such an important community facility is a privilege especially in an environment that is as remote and demanding as north Western Australia.

i2C’s responsibility in helping deliver this sporting complex was to provide a delivery service for documentation to the builder to allow the development of the community and personal bonds which are important to the historic town of Tom Price. The project was successfully delivered on time and to budget.
